Horst Bittner, General Manager
Bittner-Miningconsult GmbH,
Head of the Saarland Delegation in 2012

“UGOL & MINING in Donetsk is a fixed date for us every two years. The mines here have a considerable backlog of needs for reliable equipment both in extraction and advance services compared to mines in western Europe. Furthermore, there is huge demand for safety-related equipment.”

Dynamic investment climate

UGOL & MINING 2014

13th International Trade Fair for Mining Technology
Exploration, Discontinuous Mining,
Continuous Open-Cast Mining, Preparation

2-5 September 2014

Donetsk, Ukraine 

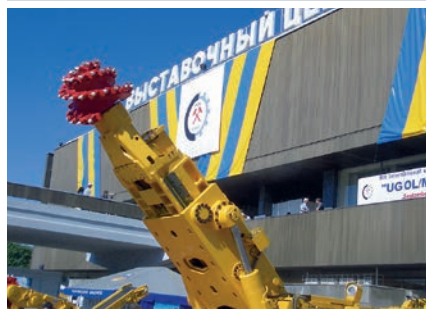

Innovative technology in all matters of mining, exploration, discontinuous and continuous mining and processing are at the focus of attention at the UGOL & MINING fair at the EXPODONBASS exhibition centre in Donetsk, Ukraine in 2014. This event, which is held at two-year intervals, is being conducted by Messe Düsseldorf for the 13th time, together with our Ukrainian partner, the Expodonbass Specialised Exhibition Centre.

The right place

With Donetsk Basin, Ukraine has one of the largest continuous coal deposits in the world. Thanks to its enormous reserves of hard coal, coking coal and iron ore, the Donbass region and its resources have made this area a major economic factor for the entire country. Nearly 93% of all coal extracted in Ukraine comes from Donbass, with benefits for the chemical, aluminium and steel industries.

Innovation needs investment

For the economic reorganisation of the region and the entire country, modern technology, innovations and knowledge are needed. There is also a great need for and considerable interest in a marketplace that presents state-of-the-art technology from international suppliers.

Sinking • Drilling and heading • Extraction (underground) • Roof support • Cutting heads • Shearer drums • Conveyors
• Process control and automation • Central control and stations • Disposal mining • Deep well drilling • Preparation
compressors • Electrical equipment and Control devices • Communication, data processing and transmission • Measurement

Exploration, Underground Mining, Open-Cast Mining,
Mineral Processing and Coal Preparation

3-6 June 2014

Novokuznetsk, Russia

Economic experts forecast stable growth and increasing revenue for Russia. With a projected average plus of 4% of the gross national product for the coming years, the country that lies to the west and east of the Ural shall be in a steadfast position.

Facts

The Russian programme for the development of the coal industry provides for an increase in output from 334 tonnes in 2011 to 430 million tonnes in 2030.

- Russia is the fifth largest coal producer in the world
- Approximately 65% of the coal is produced in surface mines
- Most important coal production area: Kuzbass Basin

The granting of licences for 55 new deposits is also planned by 2015.
(Source: GTAI)

Venue

UGOL ROSSII & MINING 2014 will take place at an attractive location, which will allow it to maintain the current and future fast-paced speed of growth: in the new fairground "Kuzbass Fair Exhibition Center" in Novokuznetsk, Savodsky District, which is located near the centre. A 60,000 sqm exhibition area for temporary trade fair halls as well as 8,500 sqm in the renovated halls 1 and 6 are available for exhibitions there. This makes it possible for us to organise, together with our Russian partner Kuzbass Fair, a trade show with a professional infrastructure.

Special topic: safety and security

Important information for the subsurface safety, particularly in light of the Russian security offensive, is provided by the special "Safety and Health at Work" show that will take place within the framework of UGOL ROSSII & MINING.

Core subjects:

- technology for early detection and prevention of explosive gases
- systems for the use of methane as an energy carrier
- providers with the corresponding know-how
- manufacturers of personal protective equipment

Richard Kandzia,
Sales Director
THIELE GmbH & Co. KG

"Russia and especially the Kuzbass region ensured a very gratifying upturn in our company. We deliver chains, attachments and pivots to Russia, predominately for the mining sector. At UGOL ROSSII & MINING, we present our new items to customers and interested parties from Russia and the entire CIS and conduct concrete negotiations every year."
